POLLUTION EXTENSION
(First Party Coverage)

Refer to Supplemental Declarations if information is not shown on this form.

We provide coverage under this endorsement subject to the terms contained in the Liability Coverage Section.

WHAT WE PAY FOR

We pay your reasonable costs to extract pollutants and remove their debris from land or water. The cost of extraction and debris removal is limited to a maximum amount of $10,000 for all covered expenses occurring during each annual policy period.

The pollution and debris removal must result directly from the actual discharge, dispersal, release or escape of pollutants into or upon the designated premises. The pollution and any resultant debris removal must be caused by an occurrence covered by this policy during the policy period.

The $10,000 occurrence/aggregate amount of insurance includes the reasonable cost of necessary testing performed in the process of pollution extraction. We do not pay costs associated with testing or monitoring pollutants to determine their identification, location, concentration or similar characteristics.

You must report losses and/or occurrences to us as soon as practicable following discovery. We do not pay for loss or damages reported after the lapse of 180 consecutive days following discovery.

All other terms and conditions remain unchanged.
